

## ***LV7330-AD A/D Converter & Audio Embedder***

### **Add Component Analog , Composite And Analog Audio Input Capabilities To Your LV7330!**

#### **LV7330-AD A/D Converter & Audio Embedder**

Leader's NEW LV7330-AD option is a conveniently packaged instrument that integrates perfectly with the LV7330 in rackmount applications to provide analog video and analog audio feeds to the LV7330. The LV7330-AD A/D Converter/Embedder is packaged in a half-rack, 1 rack unit high instrument and can be rack-mounted next to the LV7330 or in any area where conversion and/or audio embedding is required. The LV7330-AD automatically detects the video input format and embeds the audio inputs in the SD/HD-SDI outputs. The instrument is useful for adding analog input capabilities to any SD/HD-SDI audio/video instrument or to convert analog cameras, tape decks or any professional video equipment with analog outputs to digital HD or SD-SDI.

A similar package is also available for the LV5330 and mounts on the rear of the instrument to provide analog video and audio input capabilities for the LV5330. Features include :

- High-Quality SD/HD Audio/Video A/D Converter
- SD Component, Composite or Y/C Video Input
- HD Analog Component Video Input
- Four Channel Balanced Analog Audio Input
- 3 SD/HD-SDI w/embedded Audio Outputs
- 12 Bit Video, 24 Bit Audio A/Ds
- Automatic Multi-Standard
- External Dip Switch Configuration
- 5-18V Power
- Video SD Input Modes Supported  
*525i 29.97 and 625i 25*
- HD Input Modes Supported  
*1080p component 23.98psf/24psf*  
*1080i component 50/59.94/60*  
*720p component 50/59.94/60*
- Audio  
Supports 4 analog audio input channels  
(2 stereo pairs) at 48 KHz.
